Professional Summary

.NET Developer with 7+ years of experience building enterprise-grade applications in Retail, Logistics, and Internal Business Systems.

Specialized in ASP.NET Core, C#, SQL Server, REST API Integration, and POS Solutions. Experienced in designing scalable backend systems, optimizing database performance, and integrating third-party services.

Strong track record in delivering business-critical applications used by multiple departments and retail operations.

Skill Summary

- **Backend**
 - C#
 - Vb .Net
 - ASP .Net Core
 - .Net Framework
 - Rest API
 - Net 6+
- **Frontend**
 - Html
 - Javascript
 - jQuery
 - CSS
 - Blazor
 - React
- **Database**
 - SQL Server
 - MySQL
 - MongoDB
 - PostgreSQL
- **Tools**
 - Visual Studio
 - Git
 - Azure
 - SSMS
- **Architecture**
 - Clean Architecture
 - Repository Pattern
 - Dependency Injection
 - Background Service

Experience

- **Indocyber Global Technology**
.Net Developer
21 June 2021 - 31 May 2026
 - Developed and maintained enterprise retail POS applications.
 - Implemented loyalty program integration's through external APIs.
 - Designed and optimized SQL Server queries for high-volume transactions processing.
 - Develop internal web applications like ticketing, issue management and more.
 - Collaborated with cross-functional teams to deliver new features and system improvements.
- **Global Service Indonesia**
Back-end .Net Programmer
15 September 2019 - 21 June 2021
 - Developed logistics applications supporting customs documentation processes.
 - Developed Part Order Tracking applications for transaction monitoring
 - Developed Good Issue Pending applications for transaction monitoring.
 - Build Account Receivable dashboard applications for payment monitoring.
 - Designed backend services and database structures.
 - Maintained and enhanced existing enterprise applications

Projects

● Bright-POS

Role : .Net Developer

Technology : VB .NET, SQL Server, Rest API

Responsibilities :

- POS development and maintenance.
- Feature development and maintenance.
- Loyalty program integration's.
- Promotion and discount management.
- API integrations.

Business Impact :

- Improved process on POS.
- Improved customer loyalty workflow.
- Automated promotions synchronization.
- Reduce manual operational Task.

● P-Serv

Role : .Net Developer

Technology : ASP .NET Core 6, Entity Framework, SQL Server

Responsibilities :

- IT Ticketing Management System development.
- Change Request Migration from Laravel to .Net.
- Change Request workflow implementation.
- Issue tracking and resolution management.

Business Impact :

- Centralized IT Support process.
- Improved issue tracking visibility.

● Bonded Logistics Center

Role : .Net Developer

Technology : ASP .NET Framework, Entity Framework, SQL Server

Responsibilities :

- Design and develop modules for customer documentation management, including BC 1.6 and BC 2.8 processing.
- Implemented warehouse and shipment workflow supporting partial container shipments (20', 40', and 45').
- Collaborated with operational teams to translate logistics and customs requirements into system functionalities.

Business Impact :

- Reduced manual documentation processing and minimized data entry errors.
- Increased operational efficiency in handling bonded warehouse transactions and partial shipment.

● Account Receivable System

Role : .Net Developer

Technology : .Net Core, Entity Framework, SQL Server

Responsibilities :

- Developed an Account Receivable dashboard for monitoring outstanding invoices and payment status.
- Built customer feedback and issue submission features to facilitate communication regarding payment disputes.
- Designed backend services and database structures to support AR monitoring processes.
- Collaborated with finance and business teams to define reporting and operational requirements.

Business Impact :

- Reduced manual effort in tracking invoice and payment status.
- Supported more informed decision-making through centralized AR reporting and monitoring.

Additional Technical Experience

- Quartz.Net Job Schedulling.
- MongoDB Aggregation Pipelines.
- Dashboard & Analytics Development.
- Blazor Web Application.
- REST API Development & Integration.
- SQL Query Optimization.

Education

- **Darma Persada University**
Bachelor of Technology - Information Technology
Jakarta - Indonesia
September 2008 - December 2014
- **Dinamika Pembanguna 1 Jakarta VHS**
Mechanical Engineering
Jakarta - Indonesia
Juli 2005 - Juli 2008
